

## Paper Sacks

- ◎ SINGLE OR MULTI-PLY MODELS (USING THE LATEST DEVELOPMENTS IN PAPER AND PRODUCTION)
- ◎ UN DANGEROUS GOODS AND FDA FOOD APPROVED
- ◎ QUICK DE-AERATION PAPERS AND PE BARRIER LINER DESIGNS
- ◎ VARIOUS DESIGNS (INCLUDING PASTED VALVE (PV) WITH INTERNAL, EXTERNAL OR STEPPED OPTIONS)

**Paper sacks are used extensively in the chemical, food, mineral, construction and agricultural markets to pack and transport smaller batch lots, typically 25kg, for easy manual handling and use.**

Access to a global production network using the latest papers and manufacturing techniques allows us to offer the most cost effective high quality solution to your paper sack needs, be that in a manual or fully automated packing process.

[Available in single or multi-ply models](#), each sack is individually tailored to your filling, handling and transporting needs and to your customers' requirements, including [UN dangerous goods and FDA food approved](#). This means you have a high quality sack that will perform correctly when filled, is fit for purpose, improves your brand and ensures that your products arrive in good condition ready for use.

All sack types and sizes can be produced and we take

the approach that each user is individual in their needs so will expect that their process is fully understood before a solution is provided.

[Quick de-aeration papers and PE barrier liner designs](#) are available which include Pasted valve (PV), Pasted open mouth (POM), Square bottom self opening (SOS), Folded and sewn open mouth (FOM and SOM) and gusseted models.

We will hold stocks of your own specific sacks and also carry stocks of main sizes and models which allow us to offer you a fully comprehensive paper sack solution with the best quality, at a competitive price and delivered either overnight, or within 2-3 days saving you valuable warehousing and manufacturing space.
